

BookNook webpage not loading as expected

- Connect with your site IT department to ensure system requirements, network, and devices are compatible and meet requirements. Utilize our [Technology Requirements page](#) and [Tech Checklist page](#).
- Complete a Readiness Check for [Reading](#) and/or [Math](#)
- Verify that the student has entered the correct username as provided by your student's school. If you are using Clever or Classlink, sign out and sign back in.
- Clear the cache and cookies on your browser.
- If using iPads, always use app.booknooklearning.com on the web browser. DO NOT use the BookNook App on the App Store or Android Store.

Tutor cannot HEAR student

- Check that the microphone is turned on.
- Ask student to unplug and plug back in headset.
- Check web browser privacy settings for audio permissions. (*Reading Classroom only - If audio permissions were denied by your browser when entering, you will see a popup indicating that you will need to change permissions*)
- Select the correct headset on audio settings.
- Check the volume settings: microphone volume may be too low, off, or muted.
- Set expectations around the volume in the room.

Tutor cannot SEE student

- Check that the camera is turned on.
- Check web browser privacy settings for video permissions. (*Reading Classroom only - If video permissions were denied by your browser when entering, you will see a popup indicating that you will need to change permissions*)
- Select the correct camera on video settings.
- Check that camera is not covered or blocked.
- Check the internet connection. A stable internet connection is essential for clear video.
