

Dear Families and Guardians,

In partnership with your school district, your child will be participating in BookNook tutoring to practice their reading and/or math skills.

When will tutoring happen?

If information regarding when your child will attend tutoring sessions hasn't been provided to you yet, please contact either your school or [BookNook Customer Care](#) for details.

What is BookNook?

BookNook's online learning platform helps schools give students extra support in reading and/or math. It uses teaching methods that are backed by solid research using well-trained and consistent tutors. This helps students build their reading and/or math proficiency over time as they participate in BookNook sessions.

Why is attendance important?

It's important for your child to attend all their BookNook sessions to get the full benefit of the program. Consistent participation makes the experience more effective, ultimately improving student outcomes.

What else do I need to know?

Your child will attend BookNook sessions via the BookNook Platform, where they will engage in a variety of engaging activities and intentional practice in reading and/or math with the same vetted tutor for the duration of the program.

To learn more about BookNook, [click here](#). We are excited about this partnership and the opportunity to support your child alongside your school district!

Growing together,
The BookNook Team
